FARMERS, THRESHERS AND MECHANICS  
Will save money by using Lardine. No gum, no grit, and will wear out Lard or Castor Oil.  
Manufactured by McCOLL BROS., Toronto

## DEDICATORY SERVICES.

OPENING OF THE NEW METHODIST CHURCH.  
Sunday, Sept. 2d, 1888, must always be a day much to be remembered by the members of the Methodist congregation of Deseronto. On that day their Sunday school church was solemnly dedicated to the worship of God by Rev. A. Carman, D. D., one of the Superintendents of the Methodist Church of Canada, with services impressive and appropriate to the occasion. The old church had for the past two years been insufficient in every respect for the needs of the congregation and steps were accordingly taken last spring to erect a new church. Rev. A. Carman and his congregation, which now numbers about 250 families have accomplished their task with becoming spirit and commendable energy. The result was in the handsome and commodious edifice in which they will in future worship and which is certainly a credit to the Methodist denomination and an ornament to Deseronto.

Sunday was a fine autumnal day. The atmosphere was clear and, and all nature looked its prettiest. It appeared as if Providence was nodding approbation of the work accomplished by his people. Long before the hour of public worship had begun to flock to the new edifice in order to make sure of comfortable seats. These praying groups were not composed solely of the different branches of the church, but were represented, for it must be remembered that in no place in Canada do the different branches of the church of Christ live in terms of greater unity. One denomination was rejoicing; all the others felt it to rejoice with it. When the hour of public worship had arrived the church was filled with a large congregation, including many from adjoining towns and districts, all of whom had been invited to the new church. The services were commenced by the choir singing the anthem "Praise to the Lord, the Almighty, the King of the Universe," which all united in singing Hymn 602, "Great is the Lord our God," and Dr. Carman led in prayer. The lesson from the Testament, 2d Corinthians, chapter 13, was read by Rev. W. W. Andrews, and Rev. A. Campbell read the New Testament lesson, Heb. 10th chapter and 19th verse. Hymn 44th, "Being of beings, God of gods," was then sung after which Dr. Carman preached an able sermon from the text, 2d Cor. 9th chapter and 8th verse, "God is able to make all grace abound toward you, that ye, always having all sufficiency in all things, may abound to every good work." The venerable and distinguished preacher outlined and held the attention of the large congregation by his forcible and practical exposition of the subject. The discourse was rich in illustration, and enforced its arguments often quaintly but always eloquently expressed. He advanced three propositions: (1) There are some things which the Lord God does for us which it is impossible, for example, for God to lie. The preacher in commenting on this topic contrasted moral and physical power. There cannot be any doubt that no one can prevent him. This is illustrated by the wonderful operations of nature displaying the power and wisdom of God. (2) What God does for us, he does for a moral purpose. God's motive he argued was moral beneficence. He drew attention finally to the five *universes* contained in our text and concluded by enforcing the lesson that if we but meet the conditions the blessings will come from our divine Father. After prayer by Dr. Carman, the Rev. A. Campbell spoke a few words expressive of his gratitude to God for the happy circumstances in which they met and the benefit which all were receiving by the services in which they were engaged. Hymn 43, "Thy ceaseless, unexhausted love" was then sung by the congregation and the service concluded with the offering at this service amounted to the handsome sum of \$85.48.

## ATTENDANCE SERVICE.

A mass meeting and the Sabbath school assembly was held in the church at 3 p.m. There was a very large attendance and the proceedings were interesting and delightful. The purpose of the Sabbath school occupied the centre of the church, their happy and intelligent faces presenting a very pleasing spectacle. Rev. W. W. Andrews to engage in prayer, after which he resigned the charge of the meeting to Mr. A. A. Richardson, the superintendent of the Sabbath school. Mr. Richardson after a brief opening address expressive of the joy they felt on such an occasion proceeded to introduce Mr. W. B. Aylsworth, his former Sunday school teacher and one who had ever taken an active interest in Sunday school work. Mr. Aylsworth in his brief address referred to the old memories which this occasion revived. The Sabbath school he considered as a good place in which the young might learn to right. It was important that the children should learn to think. He considered that day a memorable day and hoped that many might be converted to the faith of Christ for the glory and worship of God. Rev. W. W. Andrews also addressed the scholars enforcing on them the necessity of the purpose of the Sabbath school occupied and of their seeking assistance from God in prayer. Dr. Carman at once enlisted the attention of the young people by his cheerful manner and apt illustrations. He congratulated Mr. Richardson on his fine school which was a credit to Deseronto. He gave an interesting information of the work done by the Sabbath schools of the Methodist Church in Canada, which had over 220,000 pupils and 25,000 teachers employed. He urged boys to make the best use of their opportunities by striving to get an education and impress upon parents the necessity of giving their children a chance by sending them to school. After a collection had been taken up by which the handsome sum of \$100.15 was added to the building fund Mr. Richardson, to whose energy and tact the school is largely indebted for its present prosperous condition, delivered a brief address referring with just pride to the help which the school had rendered the congregation in the past. It had now 250 pupils and teachers on the roll and was well equipped with an excellent library, papers, &c. He referred in grateful terms to the committee of the Presbyterian Sabbath school who had kindly placed their room at his disposal while his church was rebuilding. During the service the children led by the choir sang several hymns with great fervor. Several members of the Rathbun Company Band also lent valuable assistance to the choir with cornet, clarinet, &c. This service was exceedingly hearty and an important feature of the day's proceedings.

## EVENING SERVICE.

The church was packed in every aisle and corner until probably a thousand persons were present for the evening service which commenced at seven o'clock. The choir having rendered the anthem, "It was glad when they said unto me, Let us go into the house of the Lord" all the congregation then united in singing Hymn 113, "Praised be a God of dark despair," after which Rev. Dr. Carman engaged in prayer. Rev. W. W. Andrews then read as the Scripture lesson, Mark, chapter 15, verses 1 to 16th verse. Hymn 157, "Not all the blood of beasts" was then sung, and Rev. A. B. Chambers, L. L. B., of Naprean, the preacher of the evening, announced his text, Romans 8th chapter, 2d verse, "He that spared not his own Son, but delivered him up for us all, how shall he not with him also freely give us all things?" On this passage the learned preacher delivered a sermon, thoughtful and earnest, and delivered in a manner, eloquent and impressive. The preacher's arguments as he enforced the great lesson of God's wonderful love shown by the gift of his only Son could not but bring conviction to many hearts. By apt illustrations from nature he showed the universality of law in that domain and asked his hearers if it was reasonable to suppose that man alone should be exempted from the laws of the Divine Lawgiver. Man had transgressed the laws of God, and order, and peace had been destroyed. God the Father spared not his own—his only Son—until all three were alike satisfied. God having given his Son in this manner, the interest deduced from the text was that he would also give us all things and that freely. The sermon was an admirable exposition of the text. At the conclusion of the service the collection was taken and \$115 contributed. The trustees of the church having assembled on the platform Rev. Dr. Carman, in the manner prescribed by the Book of Discipline dedicated the new building to the worship of Almighty God. Hymn 118, "All hail the power of Jesus name" was then sung with great fervor and the vast audience was dismissed with the benediction.

The plan of the new edifice was designed by Mr. James T. Carman. This plan detailed the demolition of the greater part of the old church, the tower and portions of some of the old walls only being retained. The new building was designed by Mr. Wm. Mitchell, master builder for the Rathbun Company. Mr. Robert Massie, of the saw and door factory, being the draughtsman, situated at the corner of Thomas and Fourth streets, with main entrance from the latter street, the church occupies a very convenient location, the parsonage being in the rear, facing the street. The building is rectangular in shape, built of brick, and is 60x45 ft. with tower and spire 135 ft. in height. The interior has been finished and attractive appearance. There are two large doors opening from Fourth street, and on entering the new edifice is found to have been introduced; the pulpit platform is near the door and the worshipers sit facing the entrance. The floor is made of oak, and the main body is straight facing the platform, those at the sides being angular. A spacious gallery runs around three sides of the building, and on entering the new edifice is found to have been introduced; the pulpit platform is near the door and the worshipers sit facing the entrance. The floor is made of oak, and the main body is straight facing the platform, those at the sides being angular. Give us a call.

The boiler shop's manager sent in a requisition last week for a thirteen inch boiler to go into a fifteen inch hole in a boiler. Mr. Dexter found one of the required dimensions among his lath machine hands.

market to grocers at 9 a. m., during the summer and fall months. A ferry to Fredricksburg would abate the grievance by bringing in another tide of farmers, but that matter rests with the grocers and business men. The only radical cure is a bridge to Sophiasburg but that cannot be obtained until the present local politicians and business men are removed.

## HINCH & CO.

### NAPANEE.

## Canada Life Assurance Co.,

ESTABLISHED 1847.

HEAD OFFICE, HAMILTON, ONT.

Capital and Funds nearly \$10,000,000. Annual Income nearly \$1,800,000.

Managing Director, A. G. RAMSAY.

Secretary, R. HILLS. Superintendent, ALEX. RAMSAY.

SOMETHING ABOUT PROFITS.

### EXAMPLE I.

1850.

Policy 499—\$2,000. Premium, \$78.67.

### 1885.

Yearly Cash Profits, \$187.97.

Deduct Yearly Premium, 78.67.

Leaves Net Yearly Payment to Policyholder, \$109.30.

In 1850 a gentleman living not 100 miles from Montreal, took out this Policy on the ordinary Life plan, applying his profits to the permanent reduction of his premiums.

The profits had gradually reduced the annual premium until it had

diminished in 1875 to \$13.87.

In 1880—payment of Premiums had altogether ceased.

Not only this, but he was thenceforward in receipt of an annual income from the profits of \$35.20.

In 1885 this income was increased to \$109.30 per annum (as above), and in 1890 this will be again largely increased, the income growing at every division of profits until the Policy becomes a claim.

MEMO.—In the cases above quoted, as in all others where the profits are taken in this way, the profits at each division are added to those previously declared and are paid annually to the holder, until the Policy becomes a claim.

THE RATHBUN COMPANY, AGENTS AT DESERONTO.

S. G. CHAMBERLAIN, Special Agent, TORONTO.

Manufactured by McCOLL BROS., Toronto

### LINES WRITTEN

On Ann, a young girl who died from want and neglect. Kind help and assistance coming too late to be of use.

Oh! mourn not for her, every sorrow is past, Her life was a journey is over at last. Hope whispers her spirit is now with the blest, In that shadowy land—where the weary find rest.

From hunger, from sorrow poor Ann is free, The grave's but a haven of refuge for thee. In the bright land beyond—no more sorrow, Of the earth, they are early—earth no more there.

May the green turf lie lightly, while the Nymph hand disturbs thee, in peace may't rest thou. Till the last trumpet shall blow, and the dead shall arise, Then haste to thy bright home beyond the blue skies.

Fear not thou lone one, the face of thy God, He knows the rough pathway thy weary feet trod. But pleading through Him who for such as thee died, He will grant thee that mercy thy fellows denied.

T. G. P.

### HON. H. G. JOLY AT KINGSTON.

Mr. H. G. Joly, of Quebec, was heartily received at the opening of the Kingston exhibition, and devoted some time upon the dignity of the work of a farmer. He thought that too few of the farmers' sons appreciated the importance of their work.

He pointed out that the press had declared that there was a deficiency of 50,000,000 bushels of wheat to supply the demand. While he would not dwell on the importance and suffering this startling announcement entailed, he would point out the great responsibilities resting on the farmers, and the dignity their toil assumed for they were the men to whom mankind looked for its daily bread.

Was this fully understood? He thought not. He declared agriculture to be the greatest science and the grandest employment. The tendency of education was to make young men despise farmers. They thought other walks of life more dignified, but this was a mistake. Many preferred going to the city to solicit work; where, under the order and control of others, they shrank out a miserable existence on small wages, simply to avoid the so-called drudgery of the farm. He lauded education. A farmer could not have too much of it, if it only qualified and fitted him for the responsibility of his profession. He dwelt on the vast improvements made to aid the farmer, as "buried the young men not to be ashamed of their fathers' work."

Young men go back to the plough, and to continue honourably and well to work at it, to secure the approval of their fathers, blessings to be secured hereafter. Mr. Joly's address was frequently applauded. Many farmers, old and middle-aged, pressed forward to shake his hand, and thank him for the valuable words uttered.

### ROMANCE IN REAL LIFE.

A few days ago says the Kingston News, Mr. Herbert Stanley Miller, son of Mr. Garrett Miller, Ernestown, was married at Watertown, N. Y., to a Miss Baker, daughter of a wealthy retired farmer. In connection with the marriage there is what the Watertown Times calls "a romance in real life."

The two young people were engaged, but being absent from each other for some time, another young man sought the hand of the accomplished lady and he too was accepted. About a week later, however, he left to a church social, which was held the beginning of August, when the Canadian entered the church and destroyed the comfort of a wealthy retired farmer. By letting it be known that the young lady was his, Protestantism followed, but the Canadian produced letters to show that he was the one.

Seeing the position of affairs Miss Minnie, as the Times calls her, accompanied home No. 1 to the home of her parents. This, however, was a mistake, as she had arranged with No. 2, whom she professed to love dearly, to endeavor to free herself of the Canadian. She walked out to a friend's, sent word to the American, and while the Canadian held the fort at the home of the young people discussed the situation. She urged No. 2 to marry her at once; but he refused, agreeing to marry her in style if he would get rid of the other chap. The Canadian was not idle however. He arranged to have the young lady revisit her father's, which was done about a week after the meeting above referred to. The Canadian managed to have the marriage ceremony performed, and as man and wife they left for their new home at Pieton, amid tears which Minnie shed for the American, saying as she did so, "Oh—why didn't you marry me when I wanted you to?" She declared she would give anyone \$10 if they would show her she didn't like her Canadian lover a bit. But the Canadian could help his bride aboard, and in a stage whisper told the American that he had won the prize; and the grateful and sorrowful the defeated one drove slowly home.

### WHAT AM I TO DO?

The symptoms of Biliousness are unappetite but too well-known. They differ in different individuals to some extent. A bilious man is seldom a breakfast eater. Too frequently, alas, he has an excellent appetite for liquids but none for solids of a morning. His tongue will hardly leave his mouth at any time; if it is not white and furred, it is rough, at all events.

The digestive system in whole or in order and Diarrhea or Constipation may be a symptom or the two may alternate. There are often Hemorrhoids or even loss of blood. There may be giddiness and often headache and acidity or flatulence and tenderness in the pit of the stomach. To correct all this if no effect a cure try *Gree's* *Trisulphate* pills at once but a trifle and thousands attest its efficacy.

### MECHANICAL ART IN POETRY.

Poetry is a more mechanical art than most people believe. Fred Latham, who is a cousin of Lord Tennyson, has told me that when the laureate is writing a poem he constructs a rhyming dictionary of his own, thus: A, b, c, d, e, f, g, h, i, j, k, l, m, n, o, p, q, r, s, t, u, v, w, x, y, z. Then he has written a line, say—

Where Clarelud low lieth— He starts down the alphabet hunting for rhyming, getting "lieth," "trieth," "dieth," "night," "trieth," "trieth," "trieth," and so on, out of which of course it is the easiest possible thing to get the line—

The oak tree, thick leaved, ambrosial night. When the proper time comes to introduce that verse into the poem. Usually Lord Tennyson conceals the art by which he gets his rhymes by writing the second one carry line first and letting the second one carry the real burden of the thought, as any one who will read "Locksley Hall" critically will see.—Henry Drew in Chicago News.

### PERSONAL.

Mr. J. T. Greatrix still continues seriously ill.

Mrs. M. Parks has been visiting friends in Niagara.

Miss Gertrude Knapp is visiting friends in Toronto.

Mrs. H. B. Rathbun has been spending this week in Toronto.

## FOREIGN NOTES.

As a record in tiger shooting Col. Markham is called good. He has killed several.

The latest English word in Paris, is "satisfactorily," meaning one who has to struggle to get a living.

A boy who was playing on the beach near Liverpool was engulfed and smothered in a hole of his own making.

In order to popularize their own wares the German champagne makers are said to put German labels on French wine.

Majority of the property which is the property of the crown, will be turned into a music hall like the Alhambra and pavilion.

A man who slept with his false teeth in place swallowed them, and his throat was cut in order to get them out. He died in consequence.

There are fifteen Siamese students—four of them ladies—undergoing various kinds of professional training in England. They are sent by the Government of Siam.

A burglar, in the course of examination, declared that he had committed 120 burglaries in districts of London during the present year without having been arrested.

A newspaper in Constantinople says that 212 Christians and Jews have become Mohammedans during the past year, a large number than those who have abandoned Mohammedanism for other religions.

The Italian consular officers are giving out. The 4,000 workmen who used to be employed have decreased to 1,600. Calcutta is now the chief market, America and Europe taking the remainder.

Germany is doing considerable foreign missionary work nowadays. It has eighteen societies and supports 522 missionaries, who look after their 210,000 converts. Last year the total receipts in money were over \$700,000.

W. C. Middleton Field Kemp, master of the celebrated Foxhunting Harriers in Kent, has been compelled to destroy a rabbit which valuable pack in consequence of rabbit making its appearance in the kennels at Hillesborough.

By a canal lift recently finished at Arques, France, by Edwin Clark, the English engineer, five or six locks are done away with, and the boats, on an average, as much as 230 tons, are lifted fifty feet in the operation in a few minutes and with no loss of water.

The French Government is said to have ordered 20,000 portable cooking stoves for camp use for the army. The inventor, on a test, served up a dinner of three courses for thirty persons in less than an hour and cooking of less than four cents. He uses steam as the basis of heat.

A bill in the English Parliament proposes to compel the seller of a horse to announce that fact by a conspicuous placard on their shop or stall, the idea being that people are deceived by buying horses advertised for sale by the English agent who are into purchasing oleomargarine for butter.

English papers say that the swallows are scarce in various parts of the country where they used to be abundant. At a single nest they are hardly seen at all. This is attributed to the rain, which has deprived the swallows of the necessary supply of winged insects, which are fostered by the rain.

Miss Ella Baker, an English woman, the author of several successful stories for young people, was stung under the eye by a bee, and died in consequence. The swelling did not go down, and in a short time she awoke from sleep in a convulsive fit and died within a minute.

Among the exhibits at the Bazaar show a breed of dogs, the Shipley dog, which is only in Belgium. They are made use of as watch dogs on board the numerous inland navigation boats, which are small and without tails and with pointed ears of extraordinary intelligence and fidelity.

The French police have received instructions to discover the authors of an ingenious political trick, which was played by the coins of Napoleon III. and substituting the coins of Bonaparte I, Emperor, of the year 1804. So far the substitution has been confined to 10 centime pieces, and has been treated as a political joke.

An engineer at Bangkok, desiring recently to impress a Princess, who was on board of the launch, with the wonders of steam, wedged down the boiler of the launch on the steam launch he was running. The explosion killed five of the Princess's suite, and the launch was wrecked, and sent the boat to the bottom in fragments.

The debut of the City of New York is said to herald an era of ships still faster. We read that "The White Star Line is having two built at Belfast, which will be delivered to the passenger in five days. The Cunard Company has likewise two faster ones building, which are also expected in five days." The Cunard company will not be outstripped in speed, and has some new and fast boats making.

James Stacey, a well-known English driver from London to Brighton, making the distance there and back, 118 miles, in seven hours and eight minutes, the last seven hours having been eight hours and a half. The drive was made on a wicker of one thousand pounds to five hundred, and elaborate arrangements had been made for it. Four horses were changed sixteen times during the trip.

A poor man and his wife who emigrated to the Cape of Good Hope, and arrived there with little money and no prospects. The husband knew how to make mutton water, and he spent all his money in getting some material for the purpose. Then he left his wife with friends and started for ships, but getting there at last he found the stock. He built himself a little shanty, and began making and selling the water, succeeding so well that after a few months he returned to his wife with \$300 gold sovereigns hidden in a hole under his shirt. He has made a large fortune in the business since.

A Connecticut man suggests the use of flash-light photography for the purpose of detecting bank vaults from burglars. He says: "I would have a camera placed in the position where it could command in the field the space of ten feet square or more in front of the door of the vault, and have the other apparatus so arranged that as soon as a burglar would enter the door was attempted the whole would be placed in operation. My plan would of course include the use of a powerful alarm connecting with Police Headquarters, and as soon as the burglar had begun operations the police would be alerted, and the burglar made instant a picture of him, and at the same time a flash of light would be thrown on him, so that even if the men escaped, the police they would leave behind them evidence which would very probably eventually result in their detection.

## THE ALUMINUM AGE.

The Metal Which is to Revolutionize the World.

It is reported that at the Essen Krupp works, near Cologne, the metal aluminum is being rapidly turned out in 100-pound ingots at a cost of twenty-five cents per pound.

Common aluminum contains from ten to twenty pounds of iron in every 100 pounds. It is a purer metal than steel, and is much stronger than steel, and is much lighter than steel.

As iron weighs three times as much, and is, therefore, one-third as bulky as aluminum, the latter can be obtained at three times the price of iron that metal will be supplanted rapidly.

Even at the Krupp works it will be used to build bridges, and for the construction of the great railway bridges, and for the construction of the great railway bridges, and for the construction of the great railway bridges.

Aluminum conducts electricity better than iron, the comparison being one-third as well as copper, while iron is one-seventh as good as copper.

Aluminum is much lighter than steel, and is much stronger than steel, and is much lighter than steel, and is much stronger than steel, and is much lighter than steel, and is much stronger than steel.

Aluminum is much lighter than steel, and is much stronger than steel, and is much lighter than steel, and is much stronger than steel, and is much lighter than steel, and is much stronger than steel.

Aluminum is much lighter than steel, and is much stronger than steel, and is much lighter than steel, and is much stronger than steel, and is much lighter than steel, and is much stronger than steel.

Aluminum is much lighter than steel, and is much stronger than steel, and is much lighter than steel, and is much stronger than steel, and is much lighter than steel, and is much stronger than steel.

Aluminum is much lighter than steel, and is much stronger than steel, and is much lighter than steel, and is much stronger than steel, and is much lighter than steel, and is much stronger than steel.

Aluminum is much lighter than steel, and is much stronger than steel, and is much lighter than steel, and is much stronger than steel, and is much lighter than steel, and is much stronger than steel.

Aluminum is much lighter than steel, and is much stronger than steel, and is much lighter than steel, and is much stronger than steel, and is much lighter than steel, and is much stronger than steel.

Aluminum is much lighter than steel, and is much stronger than steel, and is much lighter than steel, and is much stronger than steel, and is much lighter than steel, and is much stronger than steel.

Aluminum is much lighter than steel, and is much stronger than steel, and is much lighter than steel, and is much stronger than steel, and is much lighter than steel, and is much stronger than steel.

Aluminum is much lighter than steel, and is much stronger than steel, and is much lighter than steel, and is much stronger than steel, and is much lighter than steel, and is much stronger than steel.

Aluminum is much lighter than steel, and is much stronger than steel, and is much lighter than steel, and is much stronger than steel, and is much lighter than steel, and is much stronger than steel.

Aluminum is much lighter than steel, and is much stronger than steel, and is much lighter than steel, and is much stronger than steel, and is much lighter than steel, and is much stronger than steel.

Aluminum is much lighter than steel, and is much stronger than steel, and is much lighter than steel, and is much stronger than steel, and is much lighter than steel, and is much stronger than steel.

Aluminum is much lighter than steel, and is much stronger than steel, and is much lighter than steel, and is much stronger than steel, and is much lighter than steel, and is much stronger than steel.

Aluminum is much lighter than steel, and is much stronger than steel, and is much lighter than steel, and is much stronger than steel, and is much lighter than steel, and is much stronger than steel.

Aluminum is much lighter than steel, and is much stronger than steel, and is much lighter than steel, and is much stronger than steel, and is much lighter than steel, and is much stronger than steel.

Aluminum is much lighter than steel, and is much stronger than steel, and is much lighter than steel, and is much stronger than steel, and is much lighter than steel, and is much stronger than steel.

Aluminum is much lighter than steel, and is much stronger than steel, and is much lighter than steel, and is much stronger than steel, and is much lighter than steel, and is much stronger than steel.

## The Kind of Horses to Raise.

It is only those who keep common and inferior stock who complain of the price of horses.

There is no such thing as a free horse. The horse that is worth \$200 to \$300 per head, and some times a great deal more, are going to pay for their raising, besting given to them.

Some of the best horses that are raised in the country are those that are raised in the country, and are those that are raised in the country, and are those that are raised in the country, and are those that are raised in the country.

Some of the best horses that are raised in the country are those that are raised in the country, and are those that are raised in the country, and are those that are raised in the country, and are those that are raised in the country.

Some of the best horses that are raised in the country are those that are raised in the country, and are those that are raised in the country, and are those that are raised in the country, and are those that are raised in the country.

Some of the best horses that are raised in the country are those that are raised in the country, and are those that are raised in the country, and are those that are raised in the country, and are those that are raised in the country.

Some of the best horses that are raised in the country are those that are raised in the country, and are those that are raised in the country, and are those that are raised in the country, and are those that are raised in the country.

Some of the best horses that are raised in the country are those that are raised in the country, and are those that are raised in the country, and are those that are raised in the country, and are those that are raised in the country.

Some of the best horses that are raised in the country are those that are raised in the country, and are those that are raised in the country, and are those that are raised in the country, and are those that are raised in the country.

Some of the best horses that are raised in the country are those that are raised in the country, and are those that are raised in the country, and are those that are raised in the country, and are those that are raised in the country.

Some of the best horses that are raised in the country are those that are raised in the country, and are those that are raised in the country, and are those that are raised in the country, and are those that are raised in the country.

## READ.

The measurement of the Doyle Monument to which we alluded last week we had not at hand at the time of writing. The monument stands 12 feet 6 inches high, the main shaft being 6 feet 6 inches in diameter. The base and the shaft are in suitable proportions all polished, the lowest base being 3 feet by three. The granite is what is known as Aberdeen dark grey and beautifully polished. The sculpturing public readily recognized the superiority of this class of work. Mr. Vincent Koubler of Napawee, who had charge of the work, has done it in an excellent manner securing up his well known reputation. Any persons wanting work of this nature will find Mr. Koubler a most reliable man.

## MILLTOWN.

From Our Own Correspondent.  
Mr. Ashley Wesce, who has been very ill of typhoid fever, is now considered out of danger, though for a time his friends thought his end was near.

Mr. Joseph Penick is enjoying a couple of weeks in Chicago.  
Miss Frankie Penick, of Belleville, is visiting her friend, Miss Lizzie Penick.

Miss Ella Pagan started to Model school in Madoc, last week.  
Mr. and Mrs. T. D. Appleby spent last Sunday in Belleville, at his brother's, G. A. Appleby.

Mrs. Andrew Embray is again prostrated and her death is hourly expected.

Mrs. John and Thomas Emmons finished picking their corn last week; they report the crop extra good.

Mrs. N. S. Appleby returned to Belleville last week.

Miss De Motte Appleby was visiting friends in Belleville last week.

Mrs. R. F. Pagan spent a few days last week with her sister, Mrs. Carcollan, of Belleville.

## LONSDALE.

From Our Own Correspondent.  
Our village has again been called to mourn the loss of one of our number in the person of Miss May D., the youngest and last daughter of Mr. Benjamin Haight, who died on Sunday, the 12th inst., aged 14 years, 6 months, and 9 days. The funeral took place on the following Tuesday at 10 a. m., attended by a large gathering of sympathizing friends. The services were very ably conducted by the Rev. Mr. Sanderson, of this place, who took for his text a part of the 34th verse of the 5th chapter of St. Mark.

"The funeral is not dead, but sleepeth," after which her mortal remains were laid to rest in the Lonsdale cemetery beside loved ones who had passed on in the same manner. The services were very ably conducted by the Rev. Mr. Sanderson, of this place, who took for his text a part of the 34th verse of the 5th chapter of St. Mark.

## BETHEL.

From Our Own Correspondent.  
We have all finished hop-picking. Owing to the very fine weather and nice crops they soon finished the job. The next thing in mind is selling their crops. The prospect seems good for a rather low price.

Mr. Geo. M. Gossline has gone to the States with a large drove of cattle and sheep, we wish him luck.

Mr. John Crawford is home from the North West. He is greatly taken with that country and is considering of selling out here and going there to live.

Mrs. Hitchcock and daughter, of Wisconsin, are visiting her brother, Mr. Sam. Gardner, and other friends in the country.

Mr. Richard Robinson has been awarded the contract for carrying the mail from the corner to Bethel P. O.

Miss Lucina Moxley, of Tyndinaga Reserve, has been on a visit and has returned home.

Miss Minnie Parks, of Rochester, N. Y., has returned home.

S. J. Crawford cut his knee on the year knives, but think he will soon be around again.

Mr. McQuade's new house looks very much improved since its new coat of paint.

## KINGSFORD.

From Our Own Correspondent.  
Mrs. McKane, of Chicago, is visiting her relatives here.

Mrs. Balton, of Winnipeg, accompanied by her daughter, is visiting her sister, Mrs. Robert Samson.

Mr. William Mitchell McCullough is now much better and was able to be around during the week.

The Rev. J. W. Forrester and Mrs. Forrester were visiting several of their friends in this neighborhood last week. The Reverend gentleman held service in St. Jude's church on Thursday evening when a large congregation attended.

The Rev. Mr. Tremaine, assistant to Rev. Mr. Stanton, of Deseronto, held service in St. Jude's church on Sunday. It is expected that arrangements will be made to have regular services here. There will be service on Sunday next.

On the 22nd August, at Deloraine, Manitoba, Miss Mary Summers of this place was married to Mr. L. J. Shaw, of Deloraine.

Letters have been received from Mr. Gordon from Winnipeg where he has been visiting his daughters, Mrs. Dulmage and Mrs. Pettie. He intended visiting friends in Carleton Place and other points, and expected to return next week.

Letters have also been received from Mr. John McCullough, who is visiting his friends in Winnipeg where they daily arrived with their horses in good condition. After finishing their business they intend visiting friends at different points and see the country.

Mrs. Daly left for Campbellford on Thursday to attend the wedding of her daughter Kate.

The late frosts did much injury around this section. Corn, buckwheat, garden produce and peas suffered. The wheat has been bright warm days and the farmers are busy plowing.

Several of our people are attending the Provincial Fair at Kingston.

Floods are causing great damage in Italy and the Tyrol.

Sharp frosts occurred in Dakota and Manitoba Tuesday night.

## TYNDINAGA RESERVE

From Our Own Correspondent.  
Miss Kate Maracle acquired herself creditably as organist in the absence from illness of Miss Anderson on Sunday last at Christ Church.

Miss Johnson, who has been spending a few days at Mr. C. Maracle's, returned to her home in Buffalo on Monday.

A general council was held on Wednesday, the 12th inst., to consider among other things the granting of a sum of money for rebuilding the bridge at the mouth of Mud Creek.

Sucker Creek bridge is being repaired by the county council.

According to reports from Chief Kough-tah he has left the employ of the Kiskapew Medicine Company and is making money rapidly selling his wonderful remedy Indian Oil, in Wallingford, state of Connecticut.

Several tenants, owing to high rents and continual bad crops are about to resign their leases, some to give up farming others merely changing their lots in hope of securing better land. Mr. Harvey has rented Mrs. William N. Martin's lot.

The Rathbun Bros. have completed a substantial coal on Brant's shore for hauling their new ferry boat Alberta. It will now be a question of law whether having a license from the Spharaberg court all the owners of the Alberta can prevent the old tried boat Prince Edward from running from the Mohawk side of the Bay.

Ackland Oranishyia leaves on Friday to resume his medical studies at Toronto. The Misses Beique, of Beauharis, Province of Quebec, are guests at the Mansion.

## DESERONTO MARKET.

DEAR SIR:—Your suggestion to open the market to the grocers at 9 a. m. is a very serious one for the people of this village and one I hope the Council will not countenance. I should get on the market till 9 a. m. lately, at that hour there has always been a great crowd of customers, therefore, I think it would be a great injustice to allow the grocers to rush in before the crowd gets supplied. Too bad, Mr. Editor, you can't realize these things as a.

## BENEDICT.

Editor TRIBUNE:—I am reminded weekly, by the arrival of THE TRIBUNE, of my little town and its inhabitants, and can note by the paper the growing prosperity of your village, and the growing establishment of your journal, I believe, has largely given to it, for nothing promotes growth more than the knowledge of its progress. We are much influenced by the news which it gives, the example of others imperceptibly helps to mould our own ideas and on these points we are indebted to the newspaper for the spread of information which it gives. I will go far in crediting healthy public sentiment.

In my communication I am quite disposed to run into this train of thought. My mind is carried back to the time before you had this potent factor to aid you in your progress. I am sure that you will be able to better perceive your advance than we can appreciate it ourselves. The suggestion of making some of the beautiful spots on the Bay of Quinte as a summer resort, would with a little enterprise seem quite a feasible one, for the natural advantages of scenery of land and water appears to possess every thing needed, desirable for such an object.

The idea of summer migration has with us Americans become such an established thing, that it is difficult to see how it could be too limited to induce it. Persons of contracted incomes who would not spend in pleasure for other purposes regard change of scene, and a change of point of view, and as a desirable variation in the monotony of life. In this connection I am reminded of our poor prisoners on whom some considerable sum of money has been expended.

Through some improper legislation they are consigned to their cells to pass their time wholly unoccupied. Twelve hundred in our Auburn prison are held in confinement with only about a half an hour for daily exercise. Competition with outside labor is the responsible cause of this undesirable state of things. About two hundred find employment in duties connected with the institution; these constitute the favored few for occupation for mind or body is a great blessing. By the liberality of our government our city is to be graced with a very handsome building for public purposes. The sum of a hundred and fifty thousand was appropriated for it; the corner stone with imposing ceremonies was laid the 4th of this present month; another adornment to our city is soon anticipated by the gift of ground of Secretary Seward to our little Park (all Auburn possesses).

It is to be extended and the citizens will soon have placed in position a fine strong statue of their distinguished townsman the late Secretary Seward. The statue is already completed. Preserving the memory of those who have performed distinguished service for their race has its two fold advantage; it not only stimulates individual ambition in this respect, but it is a pleasure in beautifying the spot and will be a joy for coming generations. It would be a noble thing for Deseronto to do if they could commemorate in this way the usefulness of the founder of the village by such an adornment in their little Park.

## DON T.

Let that cold run you on, You think it is a light thing. But it may run into catarrh. Or into pneumonia. Or consumption.

Catarrh is disgusting. Pneumonia is dangerous. Consumption is death. The breathing apparatus must be kept healthy and clear of all obstructions and offensive matter. Otherwise there is trouble ahead.

All the diseases of the chest, head, nose, throat, lungs and lungs, can be delightfully and easily cured by the use of Boschee's German Syrup. If you follow this already, thousands and thousands of people, who have been cured by it, and "know how it is themselves." Bottle only 75 cents. Ask any druggist.

If you could see your own scalp through an ordinary magnifying glass, you would be amazed at the amount of dust, dandruff, and dead scales accumulated. The best and most popular preparation for cleansing the scalp is Ayer's Hair Vigor.

Gens. Harrison, the Republican candidate, has issued his letter of acceptance of the nomination tendered him by his party. The tariff will be the great issue between the two great parties.

Forty-eight new cases was the yellow fever record at Jacksonville on Tuesday.

## KERR & WIMS.

ST. GEORGE STREET, DESERONTO.

## Luxuriant Hair

Can only be preserved by keeping the scalp clean, cool, and free from dandruff, and the body in a healthful condition. The great popularity of Ayer's Hair Vigor is due to the fact that it cleanses the scalp, promotes the growth of the hair, prevents it from falling out, and gives it that soft and silky gloss so essential to perfect beauty.

Frederick Hardy, of Roxbury, Mass., a gentleman fifty years of age, was fast losing his hair, and what remained was falling out. After trying various dressings with no effect, he commenced the use of Ayer's Hair Vigor. "It stopped the falling out," he writes; "and, to my great surprise, converted my white hair (without staining the scalp) to the same shade of brown it had when I was 25 years of age."

It is a similar result attended the use of Ayer's Hair Vigor by Mrs. O. O. Prescott, of Charlestown, Mass., Miss Bessie H. Bellows, of Burlington, Vt., Mrs. J. J. Barton, of Bangor, Me., and numerous others.

The loss of hair may be owing to impurity of the blood or derangement of the stomach and bowels, and a course of Ayer's Sarsaparilla or Ayer's Pills, in connection with the Vigor, may be necessary to give health and tone to all the functions of the body. At the same time, it cannot be too strongly urged that none of these remedies can do much good without a persevering trial and strict attention to cleanly and temperate habits.

Ayer's Hair Vigor, Prepared by Dr. J. C. Ayer & Co., Lowell, Mass. Sold by Druggists and Perfumers.

1888. SPRING. 1888

New and Seasonable Goods are being shown in every department at

THE BIG STORE.

We are now offering special inducements in SPRING and SUMMER DRESS GOODS, FANCY GOODS : DEPARTMENT.

As everything new is added to our Stock. When you want anything in this line come direct to THE BIG STORE.

STAPLE DRY GOODS, SHEETINGS, SHIRTINGS, COTTONADES, WHITE AND GREY COTTONS, DUCKS etc.

We are in a position to sell at a lower price than any other house in the trade.

THE TAILORING DEPARTMENT.

A very complete line of ENGLISH and SCOTCH TWEEDS are kept, and being bought from manufacturers all middle handling is avoided, and the cost to our patrons largely diminished. All the operations of the work are conducted under Mr. STODART'S close and practical supervision.

BOOTS AND SHOES.—It is almost marvelous to contemplate the magnitude which this branch of our Store has attained. All who buy their footwear from us can rely upon getting Boots, Shoes, etc., of the highest standard of excellence and at the lowest prices considering the quality.

GROCERIES and Provisions.—This Department is so well known that comment is unnecessary. A large section of the surrounding country as well as nearly all the inhabitants of the village seek their supplies at the Big Store, and the demand though large, has been amply provided for. Our Stock was never so complete as it now is, and consumers who leave their orders with us may rely with certainty on their being promptly and satisfactorily filled.

Your patronage is respectfully solicited.

THE BIG STORE, MAIN STREET, DESERONTO.

## THE LIVERPOOL OF BURMAH

Rangoon, its street scenes and its play-house.

BY DAVID KIBLER.

I have already described in a former series of letters the famous volcanic life of the Tuna coast, so that there is no need to say anything about it here. However, the my account given in my last dispatch of our morning visit to the three Burmese Queens at Rangoon may have been a little too general, as the great city which forms their present residence. Rangoon may be called the Liverpool of Burma, and it is a picture of a city which is as beautiful as the Moulmein or as historically interesting as Aye and Pagan, it is still as well worth a visit as any place in Southern Asia. More especially it is valuable now that the British annexation has substituted free communication between Upper and Lower Burma for the close exclusiveness of the old native domain—to that large class of tourists who go to "see" Rangoon, as at a common center (thanks to the famous "Golden Pagoda," which is the Mecca of the Burmese)—and meet all the various types of Burma from Siam to Tenasserim and from Assam to Martaban. The Shans of the Northern highlands mingle with the Burmese in the lower rice fields, and gaily, snowy flocks from the Mountains of Pegu jostle flocks of hummed-looking men from the swampy seaboard of Arakan.

One of the first things that strikes a European traveler in Rangoon—especially if he would happen to be a native of the Calcutta or any other great city of Lower Bengal—is

### THE WONDERFUL BRIGHTNESS

and peculiar coloring displayed by the native dress, as contrasting with the dead, unchanging white of Eastern India. From the veranda of Jordan's Hotel, in Market street, which is the native quarter, one of the largest and busiest thoroughfares of Rangoon, you look down upon a perfect forest of gay, brilliant colors, and the colors of the rainbow, and forming a very effective foil to the rich, transparent bronze of the Burmese complexion.

Not a face of the natives wears less varied and picturesque than their costumes. That enthusiastic tourist who spoke of the facial panorama of some great Eastern city, "passing through every gradation of tint from the rich glossy black of the ace of spades to the pale golden tenderness of battered ivory," has transferred the simile to the description to Rangoon without altering a word. The deep, greasy brown of the Madras, the lighter brown of the Sikh, the yellow of the Chinaman, the red of the Shan, the pie-crust fairness of the powdered Burmese lady, the "kullah" of the white-skinned English, the red of the Indian, are all mingled together as if in a great ethnological museum. The tall, wiry Malay chaffers with the sleek, broad-faced Arakanese, and the stout, round-faced Burmese from Bombay stands by the side with the flat-nosed Mongol of the Upper Irrawaddy. This queer anthropological collection serves as an admirable background to the tourists as they have only a few days to spare, having hurried through the principal streets of Rangoon and taken in the various races composed in its motley population, go home with the comfortable decision that they have "seen Burma," and as a matter of fact, they have seen it.

When you come to the city of Rangoon, the long range of "stately buildings of beaded stone towering along the bank gives you an impression of vast size and splendor which is not counteracted by the clear view of the city. Nevertheless, the

### WIDE, STRAIGHT, AIRY STREETS

the clustering trees, the fine European buildings that crop up every here and there, the quaint pictures of the old temples and Moslem mosques give to the great Burmese port a show of attractiveness hardly to have been expected from its unfavorable situation. The city is built on a low, which no small portion has been actually reclaimed from the river. And when you are driven out to the lake (the English call the great sheet of water beyond the town) and have threaded the maze of its green promontories and wooded islets, the water reflecting the golden glow of the tropical sunset, you will be quite ready to agree with the popular verdict that Rangoon is "not half a bad" place to live in after all. It has, however, one rather objectionable custom, viz., that of watering the main streets into a perfect swamp and never watering the smaller ones at all, so that your morning walk is a pleasing alternation between being stifled with dust and sliding around on a sea of mud. The streets are brown mud stamped with enough traffic to form a layer of mud, and the feet of the horsemen and the wheels of the carriages are a constant source of annoyance to the pedestrians.

One of our most pressing concerns in Rangoon was to witness a native "pwe" or the ritual performance, no difficult matter for the tourist, for your true Burmese is an enthusiastic play goer, and would rather go without his dinner any time than without his "pwe." In one of my letters from Siam some time ago I mentioned the numerous plays that we used to see in Bangkok, which frequently lasted for a week at a time, and were acted, to quote to say, by ladies of high rank, attached to the Court itself. But the Burmese "pwe" is a very different affair. Strictly speaking, it is not a play at all, the performers being merely puppets worked by strings, while the fun of the piece, such as it is, depends wholly upon the wit of the "clown"—always an important personage in Burmese shows, who prompts jokes as well as received by his audience as the "tropical scene" and "gags" of a comic performer in some more civilized capital.

The theatre, which was merely a large wooden booth with screens of canvas, stood as usual in the open street, and the scene which happened to be the entrance of the Chinese queen, close to the principal house. We took the opportunity of peering into the latter, and found several

### WORKSHOPS LIGHTING CANDLES

or burning incense sticks at the shrine, around which lay heaped on small tables quantities of fruit, flowers, and various kinds of food, including the famous Burmese "Eastern Asia, which we now saw for the first time. Old Herodotus, with that strict regard to truth, which is the mark of a good historian, describes the ants of the Indian desert as larger than foxes, but he was not so big as sheep. In the same way the Burmese practice of lighting candles "larger than crabs, but not quite so big as lobsters."

Our first impression of this open-air theatre was that of a dim cloud of shadowy faces and half seen figures stretched along the ground for nearly 100 yards in front of the booth above mentioned, and a host of sides which twinkled faintly away from their lanterns. Picking our way over this

pavement of human limbs and bodies, we at length got near enough to have a good view of the narrow stage and the puppet, in whose convulsive movements, as their pasted legs were jerked to and fro, suggested a sudden attack of perfect convulsive monomania. At first, the audience, or grannies, for an Oriental play is always eminently aristocratic. The directions of the manager, who is a European, were perfectly audible, and the latter could be plainly seen beneath the stage pulling the strings of the convulsive puppets. But this did not mean one whit the enjoyment of the honest Burmese, who, as I was assured, would remain there quite contentedly for hours, long to watch their puppet and listen to the broad jargon of the clown, who excited a roar of approving laughter every time he uttered a line of verse.

Nothing impressed me so much as the un-failing good humor of the whole crowd under circumstances of what any European would have thought an almost discomfort. The most curious from the river were savagely busy among them, the ground was damp enough to be anything but comfortable, and they were jammed together so tightly that (as Huckleberry Finn would have said) "there wasn't no room to think." There was not one grumble or one angry voice was anywhere to be heard. In picking my way through the crowd, I was struck by the fact that they were all so happy.

### ENTICED UPON A BAIT

which set a dismal snare, but his father and mother received the mishap with a hearty laugh, and appeared to be greatly amused by the whole thing.

But the Burmese is not always as peaceful and innocent as this. Like all Asiatics, he is a very cunning and terrible person, and he is not always as peaceful and innocent as this. Like all Asiatics, he is a very cunning and terrible person, and he is not always as peaceful and innocent as this. Like all Asiatics, he is a very cunning and terrible person, and he is not always as peaceful and innocent as this.

At a native village where we halted to rest, we were told that a party of British officers had already taken to their heels, and the feeble and unskillful fire of the few who attempted resistance is speedily crushed by the tremendous broadsides of the English war-jackets. An hour later the British broadsides pour into the town, only to find it empty, and the British officers are left to triumph the two gallant missionaries, who live for many a year after to tell how God had remembered His servants in their secret need.

### FALL FOLLIES

Doing light work—Cleaning the lamp.

Many an actress is born to blush "on scene."

When the grocer retires from business he weighs his loss.

The rule of a ruler is to be a ruler.

The man who hates the corner player has been told that he is a fool.

It is said that no one can arrest the flight of Time, but who is there who is not able to stop a minute?

A bartender is at all times prepared to answer you with a smile.

One of the main questions of the age in regard to women is not what they live on, but what they eat.

"Please," want to buy a shining world of hay. "It is for your father." "Oh, no; it's for the horse."

He has come to the Morgue to find a lost relative. "He is dead, but he is not dead."

Requested to define the word "disturb," Saphir said: "He is a man who pulls out other people's teeth to get something for himself."

Servant—"The mistress says, num, that she is not at home. Who will my called?"

She said to me: "You may say that a lady called who didn't bring her card."

"That's it," exclaimed Mrs. Broom at the concert, as the singers came out again in response to an encore. "Make an do it over again, and then we'll sing it."

Husband—"I think we had better give up our pew in the church for awhile, my love. Wife—"Why? Husband—"I am going in the coal business, and I hate it."

He—"I see Miss Jones's back from Paris. She (a spirit rival)—"I noticed her dress was cut rather low, but I didn't suppose you could see her back from that distance."

At a concert lately, after the ballad lady, who had been a great success, had finished her song, she was asked by a friend in the audience whether "Would I were a gun."

Asking a lady what her accomplishments are, is a generally speaking, harmless enough. Still, in these days, it might in some cases cause embarrassment to put the question, "Do you play the piano?"

The song, "I Am Warm To-night, Love, Without You," was composed by a man whose wife had left him to take care of the house, and he had gone to the theatre with one of the neighbors.

Old Mr. Bertly (reading the paper)—"I see that the King of Spain is ill. Old Mrs. Bertly—Goodness, Joshua, I hope he isn't going to die. Old Mr. Bertly—"No, he's teaching."

Doctor, I have come to see you about my little boy. "What ails him?" One leg is shorter than the other. "What would you do in such a case?" "I think I should limp, too."

A solemn old scientist printed the fact that by having food and water given to man could double his circulation, and now all the editors of the daily journals are having tanks filled to their heating apparatus.

In Mendon a young lady gave a few drops of her blood to a young man, and he died. In this country the young men prefer to bleed the old man and take the girl's blood to make her complexion.

A distinction.

At sea, on your yacht, with a fair lady by him. He asked for a kiss, but she chose to deny him. "I have no objection to it," said the lady. "I have not the slightest objection to it."

Just what punishment ought in justice to be meted out to Lawrence Russell, of Springfield, Mo., is a question. He has been arrested for shutting up his 10-year-old son in a room, and making him stand bent over in for five hours, also for tying the boy to a plank and making him stare at his face so as to attract flies to torture him.

A new song is called "When Baby Smiles in Sleep." Young and inexperienced mothers are told to hold their sweet communion with the angels, but old women who have brought up big families of savage boys should also be given a dose of sweetened water and pepper mint.

## RECENT SCIENTIFIC PROGRESS.

Fresh and Interesting Notes Collected by

A marine capital being tried at

Toulon, attached to vessels.

Steam sailing apparatus is being tried

upon the Belgian Grand Central Railway.

Deaths from cholera and typhoid fever.

This will perhaps, be had news for North Carolina.

In experimenting with seaweed, for making cotton, a beautiful dye has been discovered.

Krupp has acquired the right to make the

Maxim machine gun in Germany for twenty years.

In France poppies are being sown upon

railroad embankments because their roots prevent washing away.

The latest theory about the planet Mars

is that it is very largely covered with glaciers and with ice generally.

The marine engine is now 100 years old.

Millar having made his first experiment on

Dalwater Water in 1758.

It is claimed that wire guns can be made

at very much less cost than those of forged steel and in about one-third the time.

The Cowles process for getting aluminum

from corundum by the action of charcoal and

granulated copper does not appear to give

pure aluminum.

The F. R. H. bridge, which now rapidly ap-

proaches completion, has two main spans,

each 170 feet in length, this being 114 feet

greater than the span of the Brooklyn Bridge.

"Laborer's tale, made from the leaves of

ledum latifolium, is said by some to be equal

to the Chinese article. The leaves could be

very easily dried and pressed into a coin, a

allowing a wide margin.

Captain Ericsson, the distinguished engi-

neer and inventor, was 85 years old July 31

last, and he is said to be in excellent health

and to be able to do his work as well as

when he was 20 years old.

The French Military Commission has

proved that the shelter afforded by a layer

of concrete five feet thick is greater than

that of a wall of masonry of the same

thickness, and that the two combined afford

practically perfect protection against

melinite, which seems to be the biggest

bugaboo yet out of men.

Grasshoppers are killed by dragging across

the fields inclined canvas covered frames,

fifteen feet long and three wide, kept

up by two poles, and a horse is attached

to the canvas at one end, and the horse

is driven across the field, and the grasshoppers

are killed by the canvas.

City life is stated to be injurious to health

by medical reports, showing that farm

people live longer than city people, and

that the life of a city dweller is shorter

than that of a country dweller.

There is a jar of the brain and spinal cord

caused by walking upon stone and brick.

It has been reserved for Mr. H. Sullivan

of Madras, India, to prove or

disprove the old motto, "A blessing is a

man's word." The grounds which he takes are

that it is only the female mosquito which

does any harm, and that she does this only

about one eighth of her life.

The other seven eighths being spent in a larval

state, during which she engages in sanitary

work, and is a blessing to the community.

Lavo is said to devour the contaminating

matter of dirty water, drains, etc.

The Price of Wheat.

The price of wheat in Chicago is 2 cents

per bushel higher than it was a week ago as

a result of manipulation against a large

short interest in the September option; but

the price of wheat was found to be higher

from the highest figures, and in New York

prices are 3 cents per bushel lower than they

were last week. The decline is the result

of the advance in price of wheat being temporarily

overdone. The wheat's business reflects no

real change in the situation. The statistical

work of the government has been com-

puted by some authorities that importing

countries will require during the coming

year 1,000,000 bushels, and that the

countries having an exportable surplus

will be able to conveniently spare 250,000

000 bushels, leaving a deficit of about 750,

000 bushels. The deficit is to be made up

by the export of wheat from the United

States and the Continent and the

concentration of the carrying fleets at

Black Sea ports and the increase in the

quantity of grain on passage to the United

States and the Continent and the

concentration of the carrying fleets at

Black Sea ports and the increase in the

quantity of grain on passage to the United

States and the Continent and the

concentration of the carrying fleets at

Black Sea ports and the increase in the

quantity of grain on passage to the United

States and the Continent and the

concentration of the carrying fleets at

Black Sea ports and the increase in the

quantity of grain on passage to the United

States and the Continent and the

concentration of the carrying fleets at

Black Sea ports and the increase in the

quantity of grain on passage to the United

States and the Continent and the

concentration of the carrying fleets at

Black Sea ports and the increase in the

quantity of grain on passage to the United

States and the Continent and the

## RESCUE OF CASTAWAYS.

Thrilling Experience of a Wrecked Crew on

a Little Coral Island.

A Christchurch, New Zealand, special to

the London "Telegraph" says: "The mail

steamer, 'Herald,' which has just ar-

rived in this city, has brought news of a

rescue of a crew of men in many respects as

wonderful as any recorded in the pages of fiction.

On the 15th of April, the 'Herald' from

'James' of Glasgow, Capt. Latimer, an

iron ship, with a cargo of coal, and having

several passengers, was bound from

North Wales to San Francisco, straying

on a coral reef soon after passing the

Island of Paitia, and was wrecked on the

north of the equator. The vessel had to be

abandoned, and the boats being got out

by the crew and passengers took refuge on

the island of Paitia. They found plenty

of coconuts and some small fish, so that

they were in no danger of immediate star-

vation. The mate and four seamen volun-

teered to go in one of the ship's boats to

Samoa—a distance of 1300 miles, measured

in a direct line. The boat was provisioned

with a small keg of water, 250 coconuts, a

little bread, mutton, cheese, and whisky,

and with this scanty provision for the jour-

ney the intrepid men set forth upon their

perilous voyage. They ultimately reached

Samoa, but with only one survivor more

than alive. (Owing to

the illness of one of the crew, the other

three were unable to leave the island.)

The mate and four seamen, who had

performed the journey in their open boat

in nineteen days.

Attention was, of course, at once turned to

the unfortunate castaways left upon the

island. Among them were two ladies and

four children, two girls and two boys, their

ages varying from 3 to 9 years. The British

Consul at once chartered a schooner to go

to the assistance of the castaways, but

before the schooner could reach the island

the schooner was wrecked on the reef. The

Captain of the schooner, a small

steamer bound from New Zealand to San

## The Great Bankrupt Sale

Is now just nicely started. Many customers have called at the

### SMITH BLOCK

And carried away a lot of our bargains, and have brought numerous others anxious to get like value in Dry Goods, Boots & Shoes, Ready-Made Clothing and Carpets.

Come at once before the best is picked out.

SMITH'S BLOCK, MAIN STREET, DESERONTO.

### THE DESERONTO NEWS COY. (INCORPORATED) OUR JOBBING DEPARTMENT

In replete with an abundant supply of new type and printing material. We are therefore in a position to execute fine job printing in all its branches in first class style and at rates to suit the times. Send or call and get prices. All orders by mail will receive our prompt and careful attention.

### The Tribune.

FRIDAY, SEPTEMBER 21, 1888.

#### LOCAL NOTICES.

Buying goods in small quantities, selecting them ourselves, paying prompt cash, and taking on old jobs, enables us to offer the public new goods at lowest prices than other houses are asking for trash. Kerr & Wims.

Cheap blank books at The Tribune office.

A GENTLEMAN is desirous of purchasing a copy of the Boys Own Paper of November, 1887. Any person having a copy to spare will please call at The Tribune office.

READ THE Big Store change of advertisement this week and note the announcement which it contains concerning fall importations.

Miss Wartman, as will be seen by her advertisement, asks early inspection of her splendid stock of new fall goods at her rooms on St. George street. All the latest styles may be seen and all the goods have been carefully and personally selected. The stock includes silks, bonnets, velvets, furs, fancy feathers, ostrich feathers, ribbons, &c. The ladies will find it to their advantage to make an early call.

New four in hand neckties latest designs, scarf pins, collar & cuff buttons, shirts and drawers, cut-throat ties, and top hats, in these goods we fear no competition. Kerr & Wims.

Delineators for October at The Tribune office.

Trimming blades, newest goods in the market, plumes, dress goods, velvets, &c. procured in Toronto, during the past week, now ready for inspection. Kerr & Wims.

#### LOCAL ITEMS.

This is St. Matthew's day.

The fall session opens at Belleville next Monday, 24th inst.

The county court non-jury sessions will be held on October 2nd.

Mr. Robert Gault's new house is nearly completed. It is a very neat residence.

No. 3 engine of the Bay of Quinte railway is now running after undergoing repairs.

The Board of Methodist missions approved \$11,051 to the Bay of Quinte conference.

This office at the Terra Cotta Works is undergoing changes which will make it a place of beauty and a joy forever.

The masons have commenced the brick work on the new kiln for the chemical works and are rushing them forward to completion.

A new elevator has been put in the Terra Cotta Works to carry terra cotta material from the Vaucluse press to the different drying kilns.

The heavy rains of the past week have been very beneficial to late crops which are now in consequence presenting a very fine appearance.

A MEETING of the members of the Mechanics Institute will be held on Thursday, Sept. 27th, at 8 p. m. for the purpose of organizing a Chieftain Club.

Our thanks are due to Master Heber Featherstonhaugh, of the Mohawk passage, for a basket of as luscious peaches as ever graced an orchard's garden.

The Bishop of Ontario has arrived home from England where he had been attending the Lambeth palace conference. He is in good health and received a cordial welcome on his arrival at Ottawa.

MR. JAMES CAPLAN, M. A., of Glasgow, and Mr. John Macgillivray, Ph. D., of Collingwood, have been appointed to the chairs of English and Modern Languages respectively in Queen's College.

ONE law for all. Now that hucksters and bootleggers from other towns can come in and sell on our market without payment of fees, let the by-law which imposes a fee on peddlers and transient traders be also repealed.

How John Beverly Robinson, ex-governor of Ontario, and Mr. R. Hay, ex-M. P. for Toronto, were in town on Tuesday being their stay the guests of Mr. E. W. Rathbone. They visited the different factories and expressed themselves as surprised and delighted with the various industrial establishments of Deseronto.

MR. A. E. GRACEY will build a handsome residence on his lot facing Dundas street between St. George and Mill streets.

Why do our agricultural societies not revive the old practice of giving prizes for plowing matches?

A match between junior baseball teams on Wednesday the White Sox defeated the Maple Leafs by a score of 25 to 10; yesterday they won by 9 to 0.

The west have the agricultural college at Guelph and the east have the Dominion experimental farm at Ottawa. What is wanted is an experimental live stock farm in this section of Ontario, in lieu of the provincial grant.

MR. SOL. WHITE, ex-M. P. P. for North Essex, and well known to many readers of The Tribune in this city, has been elected for political union with the United States as the only means of making Canada a great country.

THE Toronto Enquirer and other leading journals complain that the English press is completely ignorant of Canadian affairs, giving their readers information obtained through United States and other unfriendly sources. The great majority of Englishmen know absolutely nothing about Canada. Mere colonies are of little account in England.

Notice. There are a few tardy delinquents on our subscription list this year. All such must positively settle their accounts before the close of this month. They will thus save themselves legal costs.

On Tuesday William Parks had the tip of his finger cut while at work in the shingle mill. On Wednesday Stephen Seider while drawing cars took hold of the tongue with his left hand when the horses suddenly sprang forward bringing the whiffle tree back on his fingers and very severely crushing them.

The Largest Snowfall. Mr. William Kingston, Dundas street, has been told that when a snow storm was doubtless the largest ever seen or heard of in this part of Canada. This noble plant had on Tuesday last by actual count 104 blossoms and the branch recently lopped off. We ask Picton and other newspapers to take a note of this as a govern themselves accordingly.

Mr. and Mrs. A. E. Baynard left yesterday for Hensall, Co. Huron, where Mr. Baynard enters on the management of a flour mill on the roller system which he has leased. Mr. Baynard has for some time filled the position of assistant miller in the Deseronto Flour Mills and proved a capable and efficient mechanic. The Tribune regrets that our town should lose such worthy residents and hopes that they may enjoy all prosperity in their future home.

A meeting of the council was held on Monday evening, the Reeve presiding and all the members present. The usual grants and charitable purposes were considered. The market by-law was amended in accordance with the prayer of a numerous signed petition so that in future meat can be cut off the meat, Messrs. Roach, Baker and Richardson voting in favor of the measure. It was agreed to sell the lower part of Third Street, the Deseronto Flour Mills to the Rathbone Company, and a Gas lamp was ordered to be erected at the corner of Thomas and Second street, and at the corner of Third and Mill streets.

Cherry Trip to Belleville Fair. In connection with the Belleville fair held from Sept. 25th to Sept. 28th inclusive, the steamers Quinte and Deseronto will carry passengers from Deseronto to Belleville and return at the following reduced rates: 75c to Belleville and 50c to Kingston, 35c to Trenton and return by steam, 50c to Deseronto. These rates include admission to the fair grounds. All tickets good up to 29th inst.

Steamers leave Picton and Napanee at 5 a. m. on Monday, Sept. 25th; arrive Belleville 9:15 and Trenton 11:30 a. m. Returning leave Trenton at 4:00 p. m. and Belleville 5:00 p. m.

Deseronto Cemetery. A meeting of the Cemetery Company was held on Monday evening at which considerable business was transacted. The contract for the erection of the vault was awarded to Mr. Joshua Lang. Mr. Geo. Cement has commenced work on the lodge which will soon be completed. Mr. Langdon, the superintendent, has some large quantities of lawn grass seed, and under his care the cemetery is fast becoming a very beautiful spot. Already people are taking a great interest in the cemetery, and are purchasing lots, and the old habit of wandering over the face of the earth to bury their dead will soon be a thing of the past in Deseronto.

Music Instruction. Mr. J. H. Ketcham, of Picton, will open a class for instruction in vocal music in the White Church next Tuesday evening, 25th inst. at 8 o'clock, and he desires to recruit all intending pupils as well as those interested in vocal music to be present on the occasion. Mr. Ketcham comes highly commended as one of the very best instructors in Canada. He now makes his home in Picton where he has a class of 150 pupils and is also employed by the public school board to teach singing in the schools. This is a good opportunity for all young people to learn singing and as Mr. Ketcham's terms are moderate a large attendance may be expected.

Presbytery of Kingston. The quarterly meeting of Kingston Presbytery was held in Kingston on Tuesday, Rev. R. J. Craig and a representative elder were present from Deseronto. Rev. Dr. Williamson was elected moderator. A call was read from Wallace Cottage, London Presbytery, to Rev. D. D. Brown, of Kingston. A. Chambers, of Wolfe Island, resigned his charge on account of his wife's health, and the same gentleman resigned his position as clerk of Presbytery. It was agreed to hold a meeting at Napanee on Oct. 9th to issue the call to Mr. Kelso and consider Mr. Chambers' resignation. The report of the home mission committee of the presbytery was submitted by Rev. M. Maclean, of Belleville. It was a most satisfactory one. He said there were sixteen mission fields, containing from fifty to sixty preaching stations, in charge of eleven students, who have been employed for the summer months, and five ordained missionaries. There has been a gradual increase in the number of families, at religious services and communicants. Prayer meetings and sabbath schools have been regularly and largely attended. The report of the presbytery had an immense mission field, 10,000 square miles, sparsely settled. Over 30,000 people are expended by the assembly's home mission committee throughout the mission fields and for the benefit of poor congregations within the bounds of the Kingston Presbytery. The Presbytery adjourned to meet in Belleville on Dec. 25th.

#### A Generous Offering.

Mrs. T. Stanton, of the Deanery, has very generously donated the handsome sum of \$500 towards the erection of the chapel of St. Mark's Church, Deseronto. This liberal offering will go far towards defraying the expenses of the extensive improvements now in progress on St. Mark's and the seasonable gift cannot but be greatly appreciated. It is not the first time that Rural Dean Stanton and his estimable wife have proved themselves munificent benefactors of St. Mark's Church.

#### Unger's Island.

The director of the Cemetery Company having learned that certain lewd men and women have been in the habit of resorting to Unger's Island has decided to adopt stringent measures at once to suppress the same. Accordingly at the last meeting of the board it was decided to fix up the old house on the island and station a caretaker there, who will be armed with full powers to arrest any offenders against the laws of decency or order. The beautiful island will, therefore, in the future be carefully kept as a place where respectable citizens of all classes may know that nothing objectionable will be tolerated.

#### Disinfectant.

A gentleman writing from Napanee states that the story about the Napanee being poisoned by any person is generally discredited. He says that Mr. Neo had been using paris green in large quantities on his potatoes and that he was wont to put it on with his bare hands, and that his handkerchiefs were full of it and turned green from the sweat, and that the poison was absorbed into his system. As for the dog he says he had been the head with a stone for refusing to do his duty. He considers it altogether unlikely that anyone would attempt to poison Mr. Neo.

#### Second Concert.

The Rathbone Company Band are at present very much in need of funds to pay off the debt on their band stand. They will, therefore, on Monday, October 1st, commence a series of serenades and concerts, and we hope that the Band will everywhere meet with a kind reception and that all will do their utmost to help them out of their present difficulty. The Band have now been organized for five years and people little know the services which attach to such an organization. The Band have lately secured the services of a number of good musicians and have purchased a stock of excellent music so that the people of Deseronto may look forward to several fine musical treats during the coming season.

#### Lumbering the Record.

On Friday last the Reliance reached Deseronto about 5 p. m. Mr. M. Marriag and his gang of the yard department commenced loading at 7 p. m., and put on 154,515 feet of lumber. She coaled up and left at 10:15 p. m. for Oswego, where she unloaded and started on the return trip and reached the Reliance with 275,000 feet of lumber, commenced loading the Reliance, and the wonderfully short time of 24 hours had put on 4,007 tons of lumber at 10:15 p. m. On Tuesday the department loaded the Reliance with 159,000 feet of lumber, and on Wednesday the Reliance with 20,000 feet of lumber, 542 thousand feet and 248 thousand shingles. Yesterday the Reliance was loaded with 295,000 feet of lumber. They also during the past week loaded the schooner Helen with 74,000 feet of lumber, the bark with 160,000 feet of lumber and 180 thousand shingles, together with the sloopa Moravia, Empress, Wood Duck, Rainbow and Empire and steamer Armenia and several cars. This record cannot be surpassed.

## MILLINERY.

LADIES, COME AND SEE MISS WARTMAN'S

GRAND DISPLAY OF

### NEW FALL GOODS

IN ALL THE LATEST STYLES.

HATS, BONNETS,

VELVETS, PLUSHES, FANCY FEATHERS,

OSTRICH FEATHERS, RIBBONS, &c.

Early inspection invited by

### MISS WARTMAN,

ST. GEORGE STREET, DESERONTO.

## M. C. HAMILTON is SHOWING

A FINE RANGE OF

### SUITS & PANTS

ALSO A NICE LOT OF

### LADIES' MANTLE CLOTHS.

### READY-MADE CLOTHING

IN GREAT VARIETY.

BOOTS and SHOES in the Celebrated Eagle Brand.

Every person is respectfully requested to call and inspect these goods which, for quality and price are unequalled.

Our 30 Cent Japan Tea is still booming.

M. C. HAMILTON'S, McCullough's Block.

## FALL CAMPAIGN.

Case after case of goods arriving direct from the European markets. Our importations for the Fall are very large. We are determined that although the crops are poor you will not have to go without plenty of good dresses plenty of dry goods of every description. But you say, "how do you make this out?" Just in this way—we are going to sell you good valuable cheaper than ever. We have studied the markets to purchase goods at the cheapest markets as possible, our profits are finer than ever.

### DRESS GOODS.

It's no use telling you what we have in the way of dress goods. Pile upon pile of new, rich, seasonable goods from Germany, France and Great Britain at the lowest prices possible. The only difficulty you will experience will be in the fact that there will be so many desirable goods that you will not be able to determine which is the most desirable. Prices range from 8c per yard up. Miss Allison has charge of our manufacturing department, and gives you any desired information.

### MILLINERY.

Fall Millinery Goods are to hand. It is too early to tell you all about them. Miss Smith is still in charge of this department. It is quite unnecessary for us to say anything regarding this lady. She has been in charge of this department for upwards of three years. Her work during that time speaks for itself.

### JACKETS and WRAPS.

Have you seen all the new things in this department? Jack Frost will soon remind you that these things are indispensable. We make a specialty of these goods.

### COTTON.

Have you heard that the cotton combine has bursted? This means cheaper prices and better goods. We still maintain the lead for cheap cottons. Our cottons are the best values that can be obtained. Prices 3, 4, 5, 6, 7, 8, 9 and 10 cents per yard.

### FLANNELS.

Grey Flannels, Red Flannels, White Flannels, Canton Flannels, Flannels of every description. All-wool Grey Flannels from 18c per yd up.

### Ready-made Clothing.

We are prepared for a very large trade in clothing. We have well-made suits in nice patterns at a very low price. We have all sizes and all styles.

Boys Clothing a specialty

## ROBINSON & CO.

Successors to Downey & Co.

NAPANEE.

PERSONAL.

F. D. Mott spent a few days in town visiting friends.

Miss Lily Smith is recovering from her recent illness.

Messrs T. Roach, Jr., and L. Hill, Jr. are visiting the great Industrial exhibition at Toronto this week.

Mr. E. S. Hall, of the Central Office, is enjoying his holidays visiting friends in Ohio, Toronto, &c.

Mrs. E. Mather and Mrs. N. Palmer, of Thurlow, are the guests of Mrs. James Whitton, Main street.

Mr. & Mrs. John McCullough spent several days in Toronto last week, returning home to Deseronto on Monday.

A. Chadwick of Kingston was in town Saturday on business in connection with the Kingston Agency of The Rathbun Co.

Mrs. John Stewart, St. Paul, Minn., and Miss Haught, of Cambridge, have been visiting at Mr. W. R. Aylworth's, Napanee Road.

Mr. Chas. Gouge, of the banking department of the Rathbun Co., is enjoying his vacation by visiting friends in Sydenham and other points east.

Mr. Wm. Jamieson and Master John Jamieson returned home on Monday from Toronto where they had been attending the Industrial Exhibition.

Mr. Wm. Smith, formerly of this office, was in town this week. He now holds a responsible position in the printing office of Dick, Kidder & Co., Toronto.

Mrs. E. W. Rathbun, Miss Rathbun and Mr. E. Walter Rathbun left on Tuesday for Boston where Miss Rathbun will remain to pursue her studies at the New England Conservatory of Music.

LONGDALE.

Several of our citizens have left our town and gone over to Uxale Sam's.

Miss Agnes Winters and her brother Robert left on Tuesday for Oswego to stop with her sister, Mrs. H. Hall, for the winter, their mother having gone a short time here.

Mr. Miller, Mr. Howell, had shipped his household goods to Detroit, Mich., where he expects to move in a few days. He has just acceptably filled the position of Superintendent in the Catholic school in that place while here and he has much esteemed companion will be much missed. They have the best wishes of their many friends for their future happiness and prosperity.

MARYSVILLE.

From Our Own Correspondent.

Mrs. R. McGinnis and children are visiting friends at Trenton.

Mr. John Campbell, little girl has been seriously ill.

Mr. Martin Lang left for Neche, Dak., on Tuesday.

Miss Nellie Welch left on Tuesday for Buffalo, N. Y., where she expects to reside in future.

Miss Belle Kenney who has been renewing acquaintances here for a few weeks returned to her home in Cleveland, Ohio, a few days ago.

Mr. John Hinzley, C. P. R. agent at Savanah, Ont. after an absence of five years is renewing acquaintances here.

A number of our people took advantage of the low fares by the G. T. R. on Tuesday, and went up to see the Industrial Exhibition.

The remains of Mrs. Catherine Meagher, of Muskogee, Mich., were brought here for interment last week. The deceased lady was the mother of Mr. John C. Meagher, and a former resident of this place.

Two of our young ladies who attend the Napanee high school, go down by the evening express daily, thus being enabled to board at home.

Mr. Anderson by the liberal use of new lumber, is making a decided improvement in the appearance of the little village.

Mr. E. G. Martin, at the Provincial Exhibition, Kingston, who succeeded in taking twelve prizes on his poultry although he had no smaller number than usual in the Dominion.

TYENDINAGA RESERVE.

From Our Own Correspondent.

Heretofore this hold a poor view on Thursday at which were a number of women and outsiders. After sundry preliminaries C. Maracle was elected chairman and W. C. Brant secretary. Speeches were made by Jeremiah Hill, Joseph J. Brant, Joel Johnson and other exors of the sanative tribe to which they attempted to convince the hearers that the Mohawks had been defrauded of a vast land inheritance and should appeal to the Queen. Resolutions were carried, the women and persons not members of the tribe voted to send a delegation to the Queen to England to represent the grievances to her Majesty and the action of the proceedings a collection was taken up to defray expenses. Several of the supporters of the government attended as spectators, but took no part in the discussion. We hear from the Pow-wow party that there is a hidden treasure for the Mohawks which would yield some thousands of dollars to each member of the Band. We wait patiently for our share.

Owing to the constant downpour on Sunday there was no congregation at either church.

Mr. Hill, our agent, returned on Saturday from the North West having enjoyed a well earned holiday. He had many visitors in his office on Monday to whom he gave a glowing account of the Prairie Province.

We hope our new Superintendent General whose name is rather suggestive, is not a Dude.

Some of our people took in the Provincial Fair and were much pleased with what they saw.

Friend Tom Blanchard, succeeds his garden stuff this week has induced him to divide his preparation on a large scale for 1889.

The General Council on the 12th inst. voted the sum of \$120 towards a new bridge at the mouth of Mud Creek. Whilst on the subject of bridges there should be one over Sucker Creek on the rear of C. Maracle's lot.

Mohawks have not yet learned to be provident therefore cannot rent as their white neighbors who live on the interest of money saved. Much of the land leased by the Indian department to this Reserve is owned by persons unable to work it and who depend upon rent for their support.

George Maracle returned home from Georgetown last week and is now engaged in building a neat wire fence around his lot.

KINGSFORD.

From Our Own Correspondent.

Mr. Geo. and returned from Manitoba on Tuesday after an absence of three weeks.

Mr. & Mrs. Longmair, of Camden East, are visiting their daughter Mrs. John Dinwiddie this week.

Miss Maggie Gearing left on Wednesday for Little Falls, N. Y.

Mrs. Wm. Whitton, of Thurlow is visiting her relatives in Mitchell.

Dr. and Mrs. Whiteman, of Shakespear, who have been visiting here left for home this week.

Mr. and Miss Wray, of Northport, were visiting their aunt Mrs. Gordon this week.

Mr. Robert Samson left for Toronto on Tuesday to conduct an oculist as her sight is rapidly failing the sight of one eye being almost gone.

There will be Divine Service in St. Jude's Church on Sunday next at 9 o'clock.

There will be mass in St. Patrick's Church on Sunday at 10:30.

Mrs. Down has been dangerously ill at her son-in-law Mr. Timothy Drannay's, and at last accounts her life was despaired of all the members of her family being summoned.

BETHEL.

From Our Own Correspondent.

A few of our business men of this place have gone to Toronto to attend the great Industrial Fair.

Our boys of sports are having a fine time hunting ducks. Although they go quite often they seem to bring but a very few home with them. B. C. is a sure shot but we think he got no farther the first time.

Mr. Herbert May has his new turning lathe in working order. It is a daisy and he feels proud of it. Now boys bring on your well bats. He will turn you an A. 1.

Mr. Joseph A. Lison cut 284 stalks of corn from less than three-quarters of an acre there being eight to the stock and well loaded.

Mr. T. E. Spafford's horse became frightened while passing Mr. G. Davis' traction engine and threw himself as the result no damage was done. Frank is a teacher, and unwhitely let him along side of the machine while the pony's fear soon went from him.

Well thought.

Our boys had a game of base ball with the Crofton team which resulted in victory by runs for the latter. Wake up boys and practise a little before you try twice any way before you try them once.

Mr. Frank Fraser is going to spend a few months with his relatives and friends in New York. He is going to start next week. Safe journey, Frank, and may you have the looks of a blooming peach when you come back.

A copy of the Calendar of the New England Conservatory of Music, Boston, is on hand at this is now the largest music school in the world. It was incorporated in 1879 and up to the present time more than 37,000 pupils have enjoyed its advantages. The Conservatory building has rooms for 500 lady students. The course of study in all branches of a musical education is very complete.

Notice To Creditors.

THE CREDITORS OF EDWARD GAULIN, late of the Village of Deseronto, Milwaukee, are hereby required to send to the undersigned Agent for Elmer Gaultin, Administrator of the estate and effects of the deceased, at his office in Deseronto, on or before the twenty-first day of September, 1888, their claims against the estate of the deceased. And Notice is hereby given that after the said day, no claim shall be admitted against the estate of which she shall then have notice, and the said Administrator will not be liable for the assets so distributed or any part thereof, to any person whose claim she shall not have notice at the time of such distribution.

HENRY R. BEDFORD,  
Agent for Administrator.  
September 6th, 1888.

PRICES THAT DEFTY COMPETITION.

We have the Largest Stock and Most Extraordinary Bargains in SHIRTS and DRAWERS, CARDIGAN JACKETS and MEN'S FURNISHINGS that has ever been offered in this town. Come early, Come often and bring your purses.

KERR & WIMS.

ST. GEORGE STREET, DESERONTO.

Why You Feel

So weak and exhausted is because your blood is impure. As well expect the satisfactory condition of a city to be perfect with diluted water and defective sewerage, as to expect such a complicated piece of mechanism as the human frame to be in good order with impure blood circulating through its minutest veins. Do you know that every drop of your two or three gallons of blood passes through the heart and lungs in about two and a half minutes, and that, on its way, it makes bone and muscle, brain and nerve, and all other solid and fluids of the body? The blood is the great nourisher, or, as the Bible terms it,

"The Life of the Body."

Is it any wonder, then, that if the blood be not pure and perfect in its constituents, you suffer so many indescribable symptoms?

Ayer's Sarsaparilla stands "head and shoulders" above every other Alternative and Blood Medicine. As proof, read these reliable testimonies:

G. C. Brock, of Lowell, Mass., says: "For the past 25 years I have sold Ayer's Sarsaparilla. In my opinion it is the best remedial agency for the cure of all the diseases arising from impurities of the blood are contained in this medicine."

Eugene I. Hill, M. D., 381 Sixth Ave., New York, says: "As a blood-purifier and general builder-up of the system, I have never found anything to equal Ayer's Sarsaparilla. It gives perfect satisfaction."

Ayer's Sarsaparilla proves equally efficacious in all forms of Scrofula, Boils, Carbuncles, Eczema, Humors, Lumbago, Catarrh, &c.; and is, therefore, the very best.

Spring and Family Medicine in use. "It beats all," says Mr. Cutler, of Cutler Brothers & Co., Boston, "how

Ayer's Sarsaparilla does well." Prepared by Dr. J. C. Ayer & Co., Lowell, Mass. Price \$1; six bottles, \$5. Worth \$5 a bottle.

NOTICE.

NOTICE IS HEREBY GIVEN

that the

Municipal Council

—OF THE—

VILLAGE

—OF—

DESERONTO

In the County of Hastings, after the

expiration of three months from the

publication of this notice in The Tri-

bune, of Deseronto, intend to apply

for the erection of the Village of Des-

eronto and a part of the Township of

Tyendinaga, adjoining the village on

the north side, into a town

—TO BE CALLED—

THE

Town of Deseronto

With boundaries as follows, that is to

say:—

Commencing at the water's edge of

the Bay of Quinte at the western

limit of township lot number thirty-

six (36) in the Third Concession, south

of the slash road, of the Town-

ship of Tyendinaga, and running thence

northward along the said western limit

of said lot thirty-six, and along the

western limit of township lot thirty-six

(36) in the Second Concession south of

the slash road of the Township of Ty-

endinaga aforesaid, eighty-five chains,

thence easterly at right angles to the

said western limit of said lot thirty-six

in the said Second Concession of Tyendi-

naga, one hundred and four chains,

more or less, to the western limit of

the boundary road between
